Al Infused Planning and Forecasting with IBM Planning Analytics Webinar

Nov 12th, 2020 1 pm ET Speaker: Xavier Osorio, CPA, CMA

Data-fueled insights are driving a new paradigm. <u>AI can help make sense of this complex, constant onslaught of data</u> and find actionable insights.

In this webinar, you'll learn more about:

- Predictive Planning and Forecasting
- Guided workflow and AI-generated plans
- Operationalization of plans and budgets

- Advanced pattern detection and forecasting

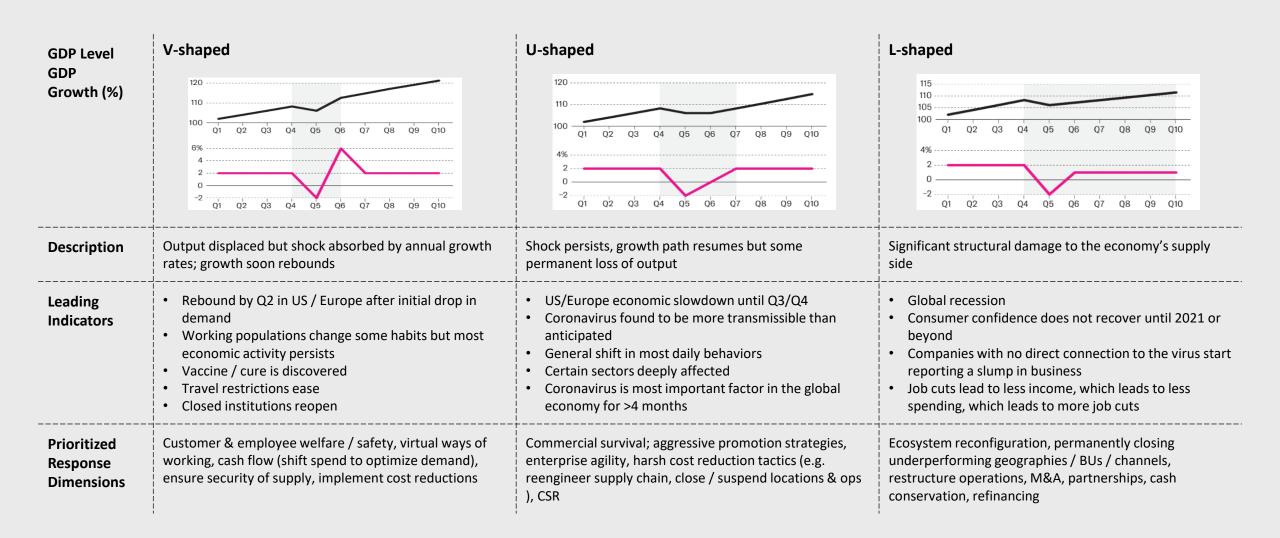

Do I have enough inventory to cover customer demand?

Is this product profitable?

How do I evaluate the impact of this new product into my sales forecast?

Different scenarios will drive vastly different impact, demanding tailored approaches triggered on leading indicators

Amidst this dramatic change and uncertainty, situational awareness and an orchestrated, responsive strategy and playbook are key

3

1

Mobilize response task force

Move with the speed of a fully aligned organization while ensuring consistency and clarity of communication

- Create crisis management team with representatives from all functions; teams within different countries and geographies as well to handle specific situations and regulations
- Quickly establish communications channels with legal/HR involvement (if not already in place) to provide a unified disaster response to employee concerns and commonly asked questions
- Draft public responses (with legal approval) to communicate situation to clients

Prioritize stakeholder safety and health

Prioritize the physical and mental health of employees, customers, and partners

- Encourage all employees to work from home and close offices wherever possible
- Stand up Slack channels, websites, office hours to communicate directly with employees once ready
- Establish digital communication channels with clients, partners and shareholders
- Provide access to dedicated telehealth resources and trauma counselors for workforce
- Ensure leadership's commitment to remote work to demonstrate commitment to the new normal

Ensure business continuity

Operate at full capacity to avoid losing revenue, while also solidifying relationships with clients as a dependable ally

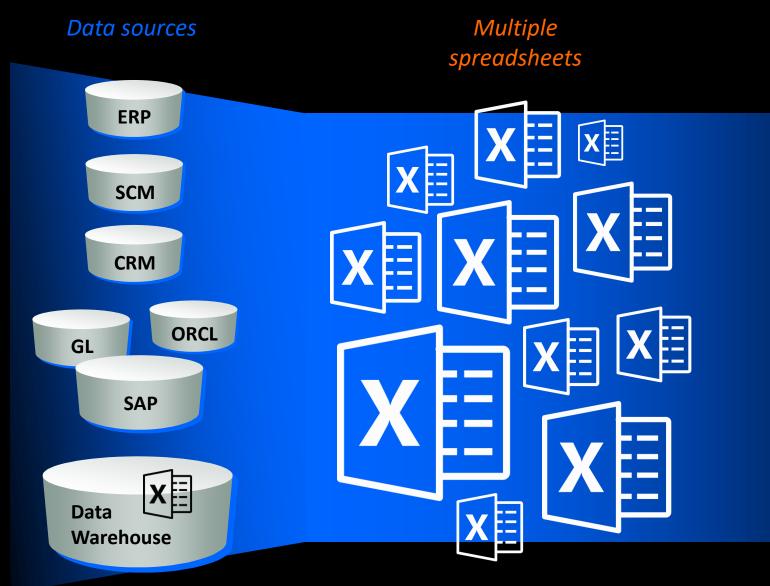

- Establish new remote-work norms including dedicated team slack channels, morning stand-ups, and scheduled touch points throughout the day with your team
- Protect the current work already in the pipeline
- Build business continuity plans for delivery of work in new ways (e.g. new employees, new employment contract types, shift in skills)
- Re-visit ongoing transformations to determine new prioritization (e.g. will ongoing cognitive initiatives help to ensure better continuity in term while cutting costs in long term?)

Revise business planning

Establish revised baseline for 2020 priorities and lay the foundation for a dynamic response strategy in nearand long-term

- Establish leadership-sponsored prioritization criteria to inform revised 2020 business planning
- Ensure leadership sponsorship and alignment in new priorities
- Engage in robust economic forecasting and demand side modeling to guide best-case, worst-case, and likely scenarios in Q2, Q3, Q4 and beyond
- Establish the framework for dynamic business planning against scenario analysis

Spreadsheet-based planning and analytics

Advantages

- Excel
- Easy to understand (everyone knows and uses Excel)
- Flexible

Disadvantages

- Manual processes
- Analytical silos
- Multiple versions of the truth
- Difficult to maintain
- Not secure

R&D Workforce Inventory Marketing Capital Financial Procurement Logistics Sales

Are your plans integrated?

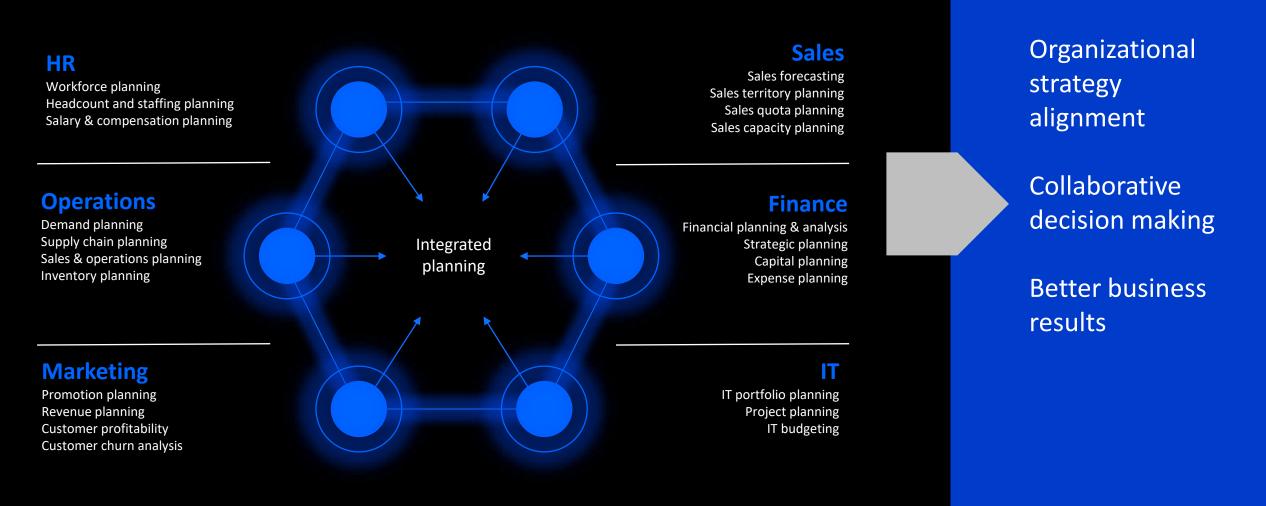

Good decisions are integrated

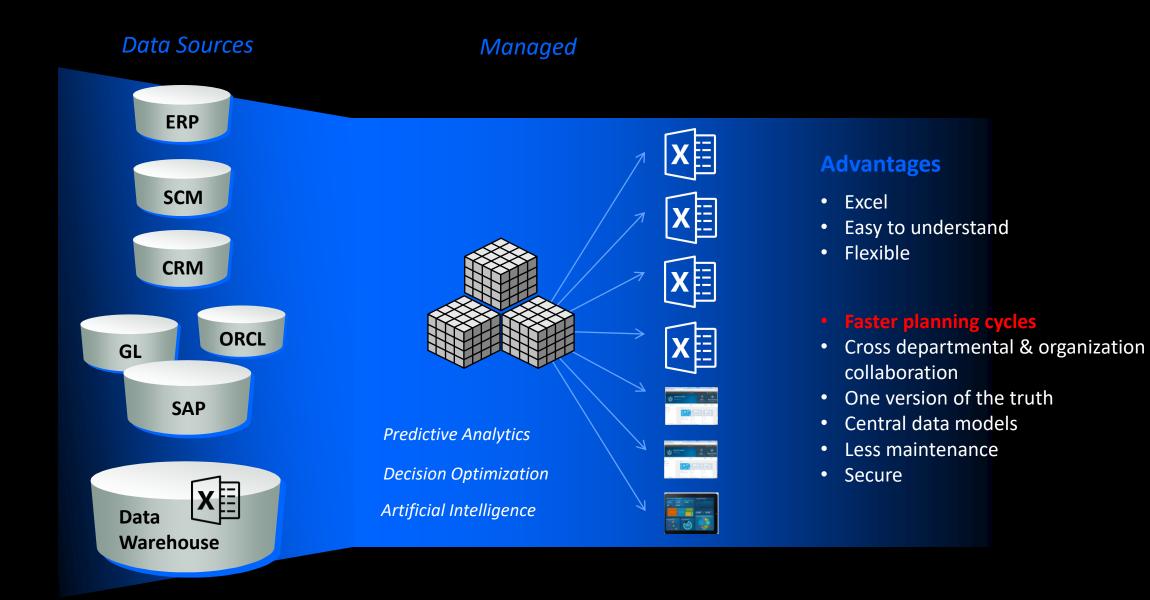

Coordinated decisions lead to coordinated execution to drive greater business performance.

Integrated planning

Applying planning and analysis across the organization

Integrated planning with IBM Planning Analytics

IBM Planning Analytics

Deploy based on your business needs and IT strategy

Full product capabilities Upgrade to full use

IBM Hosted Cloud Dedicated environment for enterprise scale

On-Demand Cloud Service From a single user license

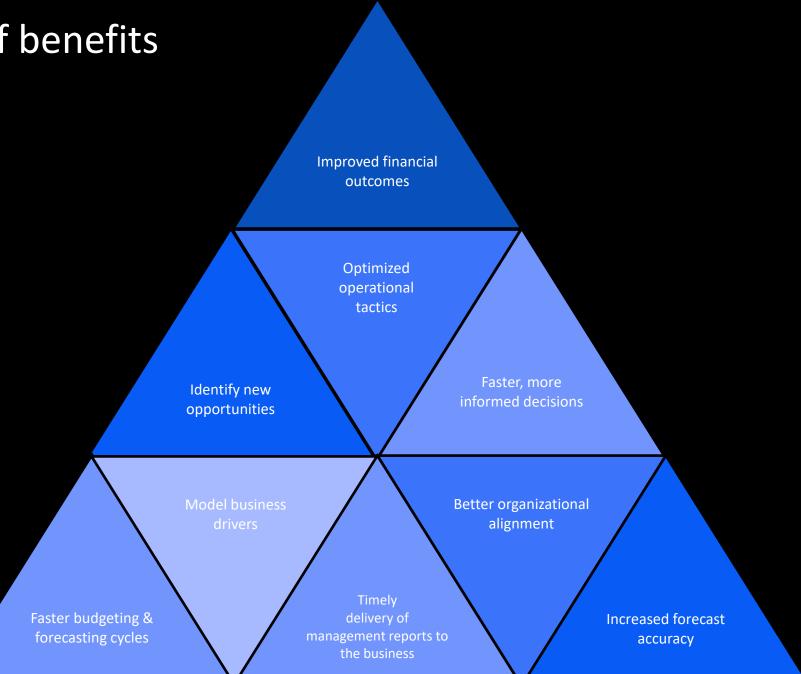

Olient Hosted

You're in control with a cloud ready locally deployed install

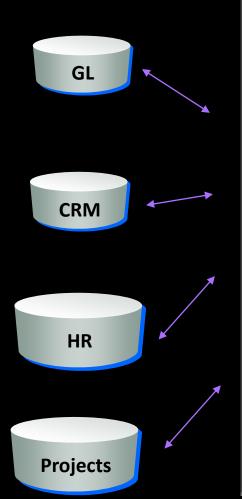

Enterprise container platform

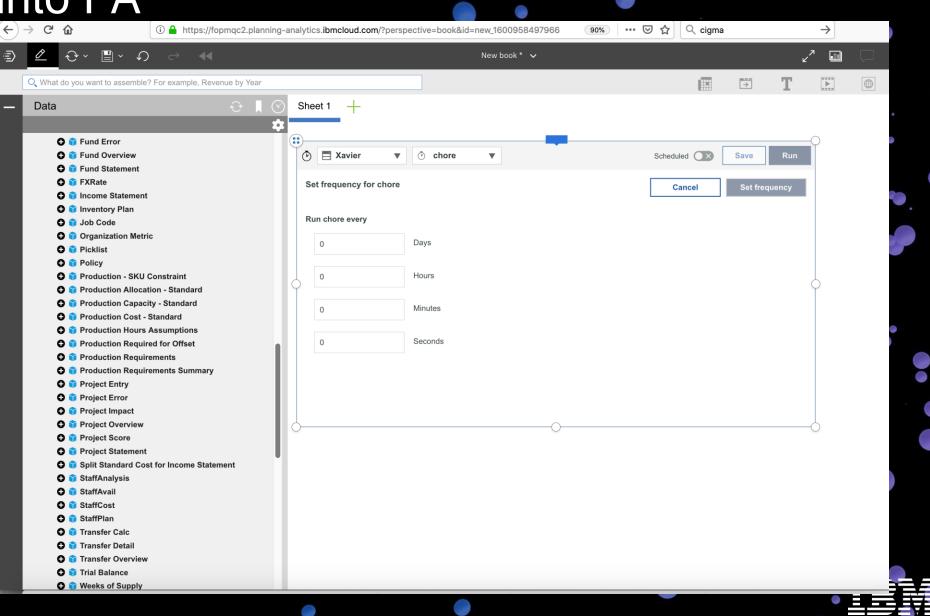

Deployable across any cloud, hybrid or multi-cloud environment.

A hierarchy of benefits

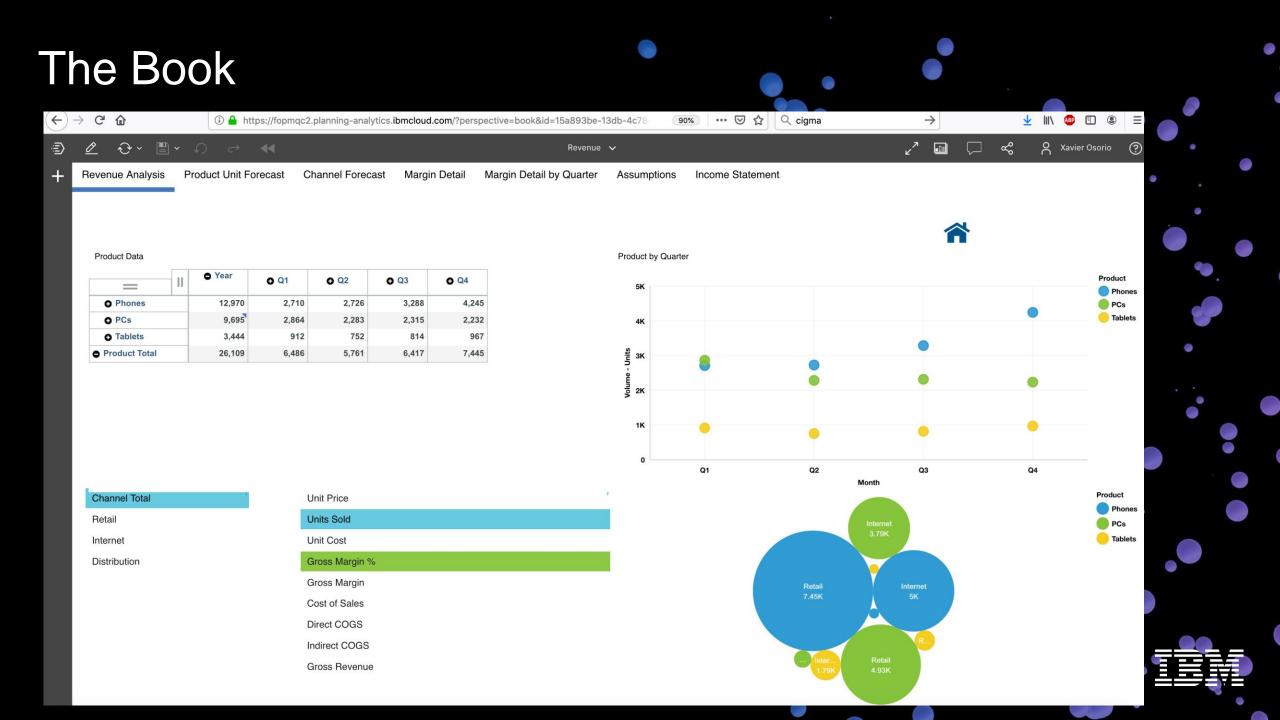

Moving data into PA
